I have two functions: function callback_1() { return 'call me'; } function callback_2($p1) { return $p1; } I want to call them as follows: function myFunction() { callback_1(); callback_2(); function callback_1() { return 'call me'; } function callback_2($p1) { return $p1; } } My questions: Is this a correct way to do it? Is this a good method? Is there some way to do this without having to define callback_1 inside myFunction()? Update: I want to add that this is part of my API.
